

ACTIVITY: Student Programs

Directions:

Create a marketing brochure for NASA student programs. Your purpose will be to “sell” the website locations to other students so they learn about what is available there. Ask your teacher for specific details on how the brochure should be created. Using the resources found at www.nasa.gov and www.education.nasa.gov, collect information on several programs and resources. The first one has been done as an example.

Website Title and Address/URL	What is great about this site?	Audience
NASA Kids Club www.nasa.gov/audience/forkids/kidsclub/flash/	There are many fun activities that children can play to get excited about science. They won't know they are learning. I liked the sound effects and the cool graphics.	This site could be marketed to all kids who like fun, interactive games. It says K-5, but my brother who is in 7th grade likes to play some of these games.
