🔧 ACTIVITY: Where in the World?

Directions:

Use this sheet to document your observations, inferences, and predictions for each photo.

Observation. Describe the photo by listing 3 observations. An observation is an accurate report of what your senses detect when carefully viewing the photo.

1. _____

2. _____

3. _____

Inference. By studying the photo, what can you infer about the geography of the photo? Remember, inferring is interpreting an observation. Inferences are not facts. Instead, they are one of many possible interpretations. Combine the evidence (your observations) with your experience or knowledge to interpret what you believe is happening in the photo. Describe your inferences below.

_____

_____

_____

Prediction. Now make a prediction about this photo. Based on your observations and what you know about the world, where in the world do you think this photo was taken? Write your prediction below.

_____

_____

Classification. Now match the photo side with its appropriate description, and compare your inferences and predictions with the data that is provided in the description. Were your inferences correct? Was your prediction proven? Explain below.

_____

_____

_____
